

Call for Applications

IDPool is looking for and welcomes eager, active and ambitious designers, artists, architects and other creative professionals to invite them for a 3 month long residency.

Besides the willingness to exchange ideas, IDPool offers accommodation, workplaces and the support of Vista Alegre's experienced craftsmen.

IDPool International Design Pool

ABOUT

IDPool is a creative laboratory and a production centre in the fields of porcelain, crystal, and ceramic that has the intention to stimulate the exchange of ideas and experiences between creative artists and high qualified professionals.

IDPool is supported by Vista Alegre Atlantis (VAA), a company with a long and distinguished history since 1824, and one of the most famous and prestigious brands in Portugal and aims to support young talent from around the world. We are offering a unique opportunity to develop projects in the confines of Vista Alegre charming ceramic factory located in Ílhavo, Portugal. Vista Alegre is a factory with a wealth of experience, dedication and knowledge in the production of ceramic products for decorative and tableware

PROGRAM

The IDPool's aim is to be a professional, attractive and stimulating experience and to bring together creative people from all over the world to work in mixed groups, promoting design thinking through the presentation of ideas, debate and discussion.

The main goal is give shape to ideas and define a product development project down to the last detail, considering both the possibilities and limitations of the industrial manufacturing processes.

The participants will have the opportunity to manage the product industrialization process in its totality, succeeding in each project phase and collaborating with specialized professionals in a way that strengthens their research, conceptualization and communication skills.

A support team of engineers and technicians staff will offer advice and instruction in the use of machinery, equipment and tools.

Participants will be able to experiment all techniques and processes such as modeling, moulds, working with clay by hand, slip casting, glazing, aero graphing, hand-painting, decal development and printing.

Participants will be guided in the development, production and execution of their project, all the way to the final product.
